Claims Allowed

Claims 1-19 are allowed over the prior art of record. The claims are allowable because the prior art does not anticipate nor render obvious the invention of a transmission with a first clutch mounted between a housing and a rotatable case to selectively lock an input side gear to the case to provide a first reduction ratio, and a second clutch mounted to the housing to selectively lock an opposite side gear to the housing to provide a second reduction ratio.

Prior Art Discussed

The examiner has considered all of the references cited in Applicant's Information Disclosure Statement filed July 30, 2003. None of the references show all of the features of the claimed invention.

The references cited by the examiner are deemed pertinent to applicant's disclosure. Power '112 shows a multi-speed bevel gear transmission but does not show a gear that could be called "an input side gear". Collins '802 shows another multi-speed bevel gear transmission but does not show a clutch equivalent to applicant's "second clutch". Ellis '898 shows yet another multi-speed bevel gear transmission but does not show a part that could be called a "case" as defined in the claims, nor is there the equivalent of a "second clutch".

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dirk Wright whose telephone number is 703-308-2160. The examiner can normally be reached on Monday through Friday, 8AM-4:30PM.
